- Product Manager, Petroleum and Water Systems (PM PAWS)
- Intergraded Logistic Support Center (ILSC)
- Deployment Equipment Product Support Integration Directorate (DEPSID)
- Troop Support Group
- TACOM War Reserve Office
- TARDEC

Concerns/Solutions

- Accountability-No assigned Hand receipt holder – Ops plan being reviewed w/ chain of custody
- Storage containers- Plans outdated – Containerization plan is being updated
- Manpower- Large amount manpower used to make operational during deployment – Short term: Engineers to deploy, Long term: RIFTS will reduce manpower
- Recovery- No recovery plan in writing - Plan now being developed
- Upgrade 800GPM Pump- Analog verse Digital gauges – will be updated at Depot
- Obsolete Parts- Needs to be identified with replacement parts – Updates in process, research and new acquisitions being planned
- Training (MOS)- IPDS-trained soldier should have special skill identifier - Working with CASCOM on a pilot program
- TACOM Task Team formed – working toward successful solutions!!!
